ProScribe, the second largest medical scribe company in the country, is looking to hire several medical scribes in the Monterey, CA area. We have partnered with the Monterey County Surgical Associates to provide services at their facility. We have various full-time and part-time positions available.

Scribing is by far the best pre-health opportunity for students these days. Scribes spend quality time in clinic with physicians and get to pick their brains on each and every case throughout the day. It's essentially super shadowing... that's paid! I know most professional schools look favorably on scribing as it relates to satisfying their clinical hour requirements. I see this as a great opportunity for your students to get those valuable hours while making some extra money. Our employees who go on to PA school historically do *VERY* well in class! From talking to our scribes, I've learned this clinical exposure also helps them to see "the end to the means" which can make studying way easier in undergrad as well.
